PUBLIC NOTICE

Central Office, P. O. Box 1105, Richmond, Virginia 23218

The purpose of this notice is to seek public comment on a draft permit regulation from DEQ that proposes to replace and update VAG84 (the VPDES Nonmetallic Mineral Mining General Permit 9VAC25-190) which expires June 30, 2014. The general permit contains limitations and monitoring requirements for point source discharge of treated wastewaters to surface waters and storm water management conditions at nonmetallic mineral mining facilities. The general permit regulation is being reissued in order to continue making it available for these facilities to continue to discharge. Substantive changes proposed include changing the due dates for registrations to be submitted, requiring proof during registration that any discharge to an MS4 has notified the MS4 owner and allowing for electronic submission of registration statements. Special conditions have been added to require no solids deposition or oil sheen in surface water, discharges to the Chickahominy watershed must meet the Chickahominy special standards in 9VAC25-260-310, added temporary facility closure procedures, and termination procedures. The storm water management conditions have been reworded to more closely align to the language in the 2009 Industrial Storm Water General Permit. Also, monitoring requirements clarified that samples from a storm water management structure must be representative of the discharge. All other storm water samples must meet certain timing requirements after measurable storm events. Also a requirement added that storm water monitoring must be attempted at least four times during the annual sampling period.

Public comment period: July 15, 2013 to September 13, 2013.

Public hearing: Thursday, August 29, 2013 at 1:30 P.M. at the DEQ Piedmont Regional Office at 4949-A Cox Road, Glen Allen, Virginia 23060. An informal question and answer period will be held one half hour prior to the public hearing (1:00 PM) at the same location for interested citizens to ask questions pertaining to the proposal.

The DEQ contact is: Elleanore Daub, Phone: (804) 698-4111; Email: elleanore.daub@deq.virginia.gov; Fax: (804) 698-4032.

The purpose of this notice is to seek public comment on a draft SWCB general permit regulation (9VAC25-151) that proposes to replace and update VAR05, the VPDES Industrial Storm Water General Permit, which expires June 30, 2014. The general permit establishes pollution prevention plan requirements, monitoring requirements, and special conditions for facilities with industrial activity storm water discharges to surface waters. The permit conditions are set to protect the water quality of the receiving waters. The general permit must be reissued in order to continue making general permit coverage available for these facilities. Substantive changes proposed include two new reasons why a facility's discharge would not be eligible for coverage, allowance for administrative continuance of coverage, coverage restrictions for newly constructed facilities in the Chesapeake Bay watershed (CBW), increased all monitoring to semi-annual, eliminated follow-up corrective action monitoring, allowed a waiver from some permit requirements for inactive and unstaffed facilities, added special monitoring for facilities in the CBW, added special requirements for facilities discharging through an MS4 in the CBW, and for expanding facilities in the CBW, allowed properly closed and capped landfills to be exempt from permitting, added benchmark monitoring for certain facilities in sectors A, C, N, Q, R, S, AA and AB, and added effluent limitations for deicing at primary airports.

Public comment period: July 15, 2013 to September 13, 2013.
